鸿清压滤机

为您考虑一切

Hongqing Filter Press Considers All For You.....

鸿清永远是您最好的朋友!

Hongqing Is Your Best Friend Forever!

纳污水为清泉 化污泥为资源

Change sewage into spring and sludge into resource

F 压滤机系列
Filter Press Series

2600型环保节能高效压滤机
Type 2600 environmental protection, energy saving and high efficiency filter press

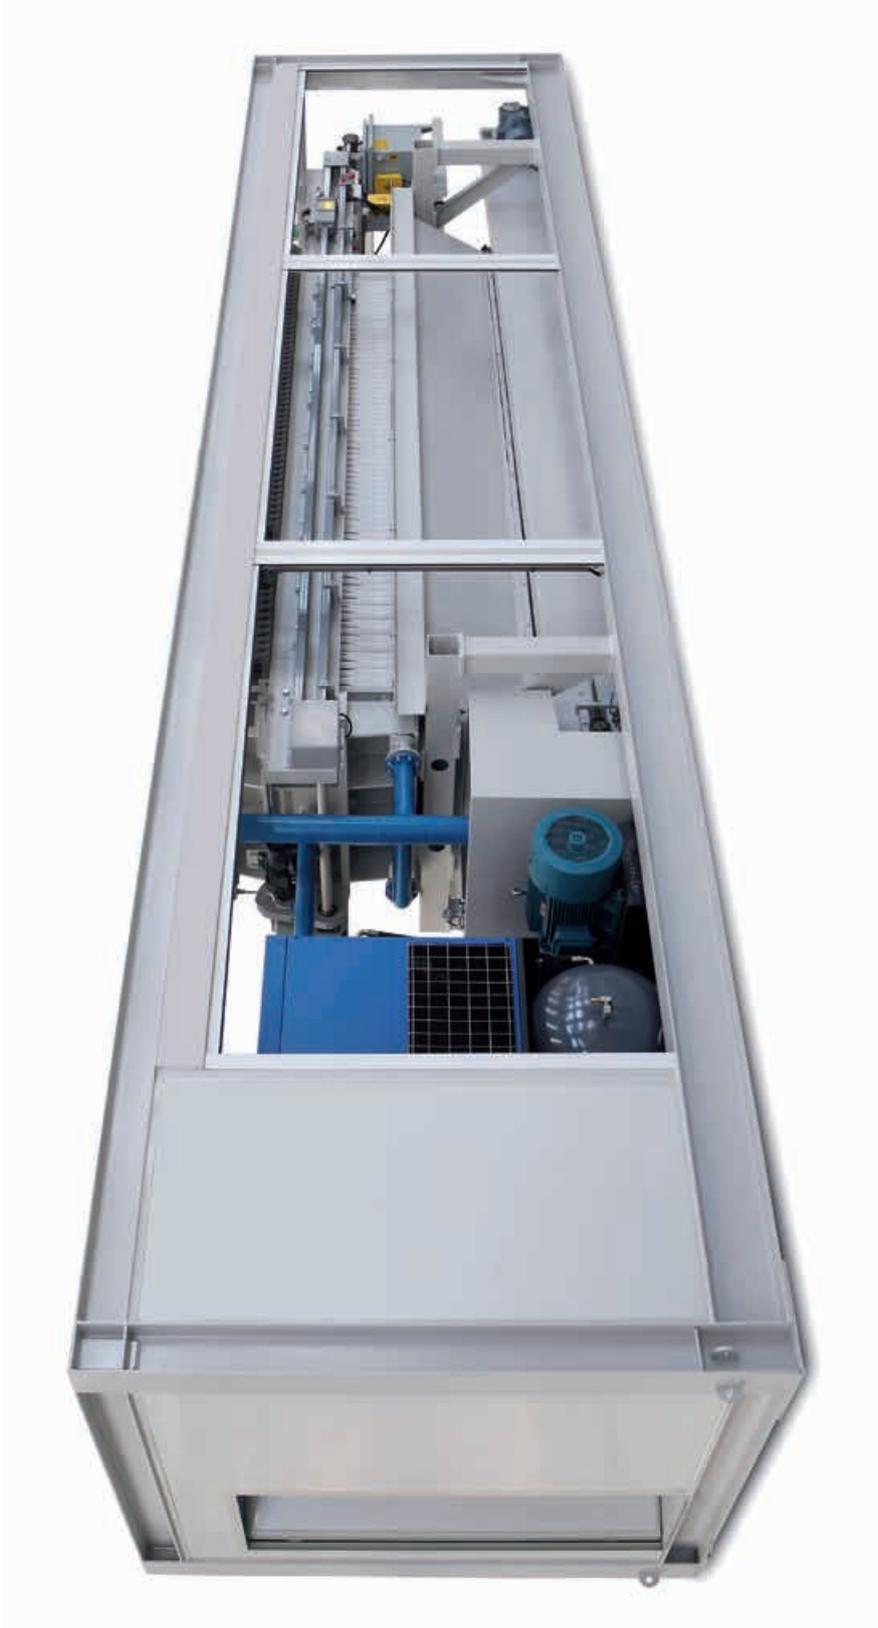

节能高效滤榨机

energy saving and high efficiency squeeze filter

F 压滤机系列

Filter Press Series

车载压滤机
Vehicle-mounted filter press

移动式架滤机

Movable type framework filter press

F 压滤机系列

Filter Press Series

250型手动压滤机
Type 250 manual filter press

程控压滤输送一体机
program-controlled filter&conveyor all-in-one filter press

鼓膜 100公斤高压滤机

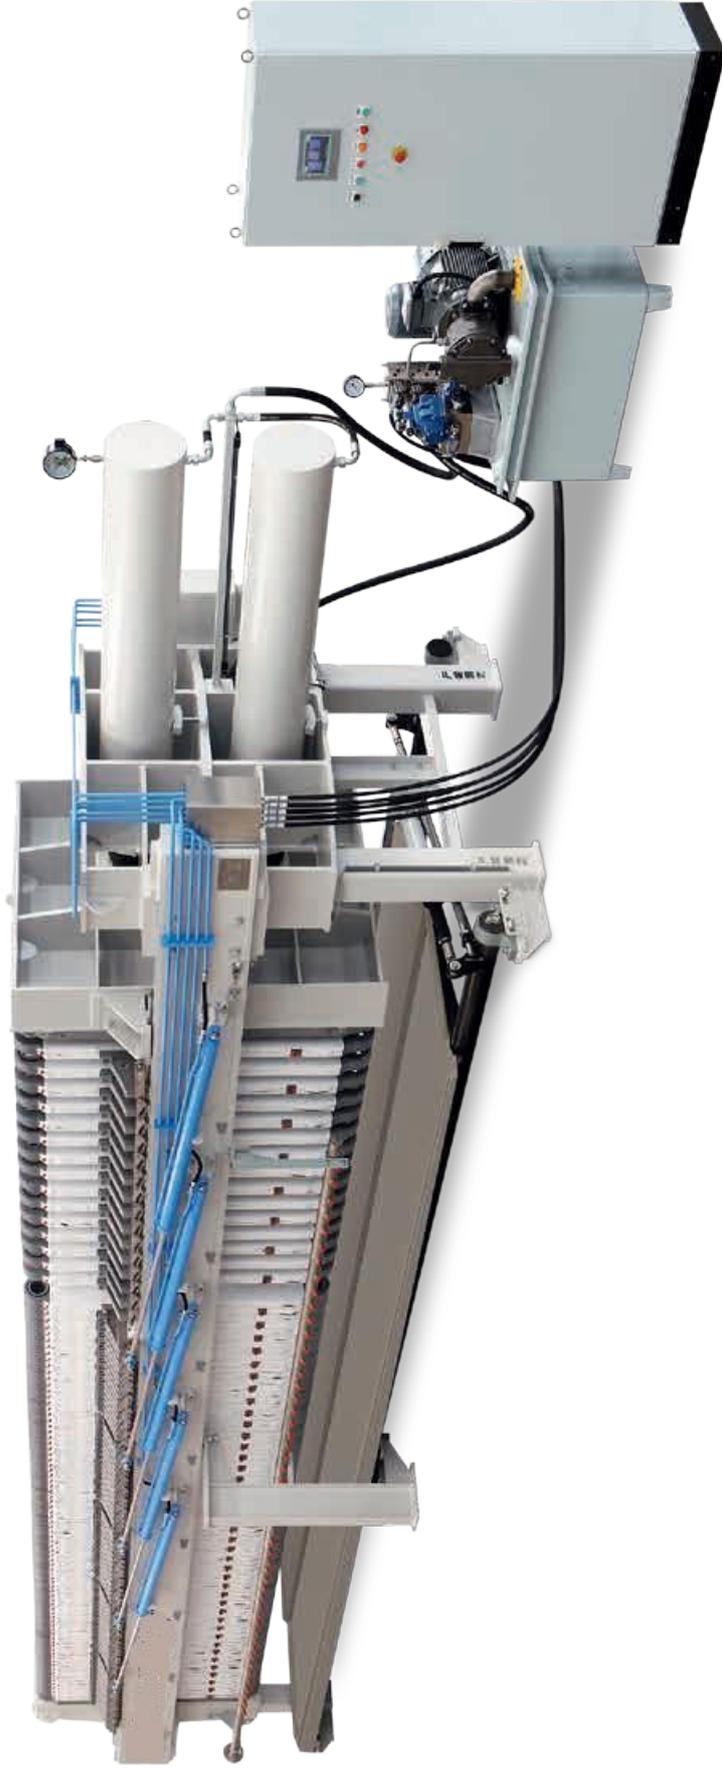

High pressure filter press with 10Mpa squeezing pressure

F 压滤机系列

Filter Press Series

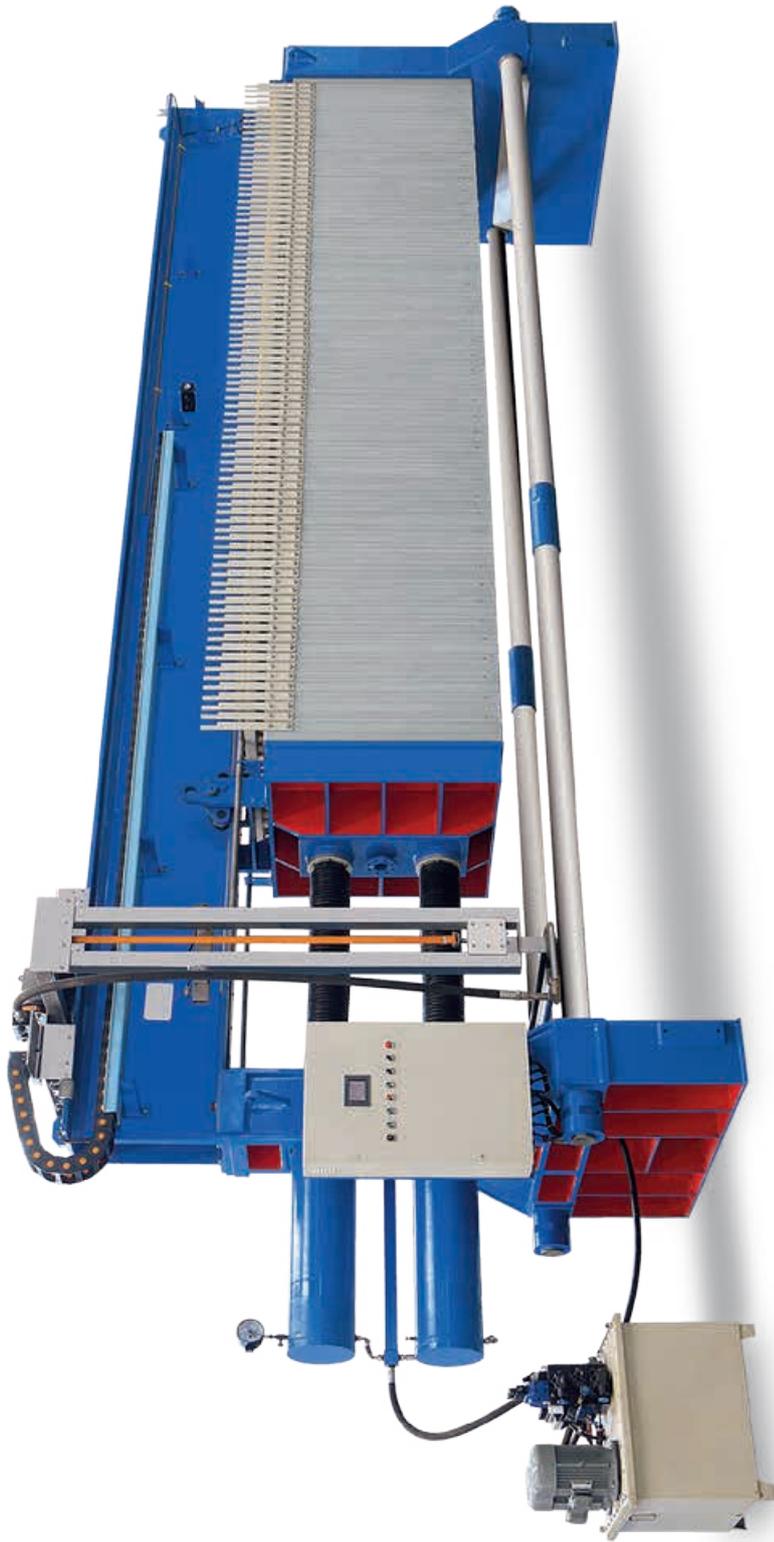

程控自动压滤机
Program-controlled automatic filter press

快速自动压滤机
Quick open automatic filter press

F 压滤机系列

Filter Press Series

智能悬梁式压滤机
Intelligent over beam filter press

制糖专用节能高效压滤机

Energy saving high efficient filter press for sugar industry

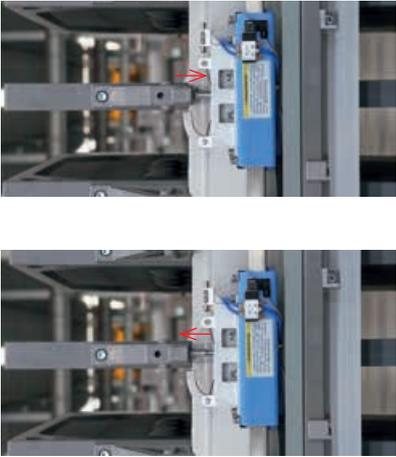

F 压滤机系列

Filter Press Series

高效压榨机
High efficiency squeeze filter

内部振动原理
Vibrating principle

外洗外排振动压滤机
Vibrating filter press with outer washing and discharging

F 压滤机系列

Filter Press Series

程控滤布曲张压滤机
Program-controlled filter press with extendable cloth mechanism

程控滤布曲张组合式压滤机
Program-controlled combined type filter press with extendable cloth mechanism

程控气动振打压滤机
Program-controlled pneumatic vibrating filter press

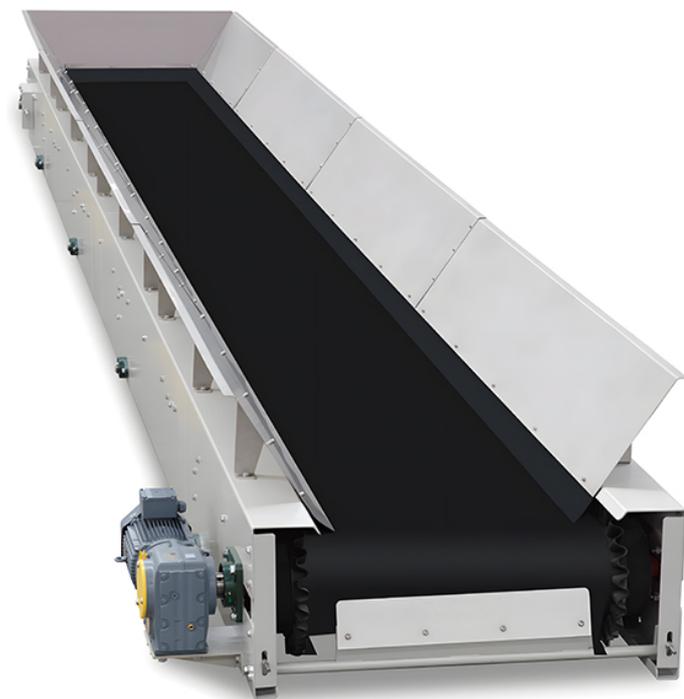

自动锁紧压滤机
Self locking filter press

搅拌机广泛应用于化工、医药、食品、采矿、造纸、涂料、冶金、废水处理等行业，符合以液相为主体的搅拌操作，实现液-液、液-固、气-液、气-液-固等多相混合与传热、传质、化学反应过程操作，此搅拌试验台采取不同槽型与搅拌器型的搭配，通过对流体实际搅拌流场的观测试验与数据测试和采集、优化方案设计、研发新型实用桨型，在充分满足搅拌工况条件下，达到采用合理搅拌器以最少功率消耗来实现最佳搅拌效果的目的。

Agitators are widely used in chemical, pharmaceutical, food, mining, paper, paint, metallurgy, waste water treatment and other industries, suitable for agitating operation with liquid phase as the focus to achieve multiphase mixing including liquid - liquid, liquid - solid, gas - liquid and gas - liquid - solid and heat transfer, mass transfer and chemical reaction. In this agitating test-bed, different trough types have been adopted to match with agitators. Through the observation test of actual flow filed of fluid agitating and data test and collection, we have optimize the design and developed new practical propeller type in order to achieve the best effect of agitating with minimal power consumption under the full working conditions.
